INFO@LEADWARRIOR.COM

Henschel 33 were among the trucks most widely used in Germany during WWII - both in army and in commercial use.

This set of wheels represents the late-war type, with a commercial tyre pattern, and fixed by six bolts (instead of two, as provided in the ICM model kit).

The set includes 12 wheels:

2 front wheels, 4 outer rear wheels, and 6 inner rear wheels, two of which are the spare ones.
